

Eco Oils Ltd.

EcoOils was incorporated by the Kewalram Chanrai Group (www.kewalramchanrai.com) a diversified global resources and distribution enterprise with a 150-year business heritage. Our primary business is recovering reusable oils from vegetable oil refining, to develop new industrial products and applications thereby reducing the GHG and impact on the environment.

EcoOils has optimized business operations and today counts as part of our business scope, the manufacture and formulation of sustainable vegetable lipids to produce biofuels, lubricants and soap stocks. We maintain two manufacturing facilities in Malaysia and plan to set up a new one in Sabah.

Products/ Services

EcoOils has developed new products and technologies which add to its competencies in the areas of Industrial Oils (Lubricants, Biofuels & Palm Fatty Acid Distillate). The recovered Industrial Grade Oil finds its application in formulated bio-degradable oil for lubricant industry as a base material and also as refined industrial grade oil to replace crude palm oil as Biofuel/Biodiesel feedstock.

The by-product from refining plant, Palm Fatty Acid Distillate (PFAD) is a superior feedstock for soap manufacturing.

Contact Address

65 Chulia Street, #49-01 OCBC Centre, Singapore 049513.
