

## LIPIDS TERMINAL SDN BHD

Lipids Terminal Sdn Bhd is an industry leader in the handling and storage of bulk liquid products through its ownership and operation in Westport, Pulau Indah, Malaysia. It is the lessor of more than 18,000 MT of storage capacity catering to the needs of a wide range of liquid vegetable oils apart from the different types of palm oil products exported.

Bulk liquid storage terminals provide an essential link in the supply chain of the palm oil industry particularly in the downstream sector. Apart from the primary business activity of leasing storage capacities, another revenue earner of Lipids Terminal Sdn Bhd is the provision of ancillary services such as product throughout transfer, heating and blending which can be tailor made in accordance with customers' requirement.

To be cost effective, our pricing is largely dependent on the services provided and the infrastructure available including an efficient pipeline system, deep water berths and easy access to major roads and highways.

### Products/ Services

Storage and bulking installation of palm oil products.
