

PACIFIC OILS AND FATS INDUSTRIES SDN BHD

Background

Pacific Oils & Fats Industry Sdn Bhd (PACOIL) was established in 2002 through acquisition of a refinery in Malaysia. PACOIL is equipped to process Crude Palm Oil as well as Crude Soft Oils such as Sunflower Oil, Corn Oil, Soyabean Oil etc. into refined oils and other downstream specialty products. Together with its refinery in Indonesia, Pacific Inter-Link (PIL) group has become one of the largest edible oil refineries in South East Asia with a capacity of over 1 million MT per annum, and its products are exported to markets worldwide. Various refining units under one manufacturing complex provide PACOIL the necessary flexibility to cater to specific customer's needs and re-emphasize the group's commitment to quality & prompt deliveries. PACOIL is located in the heartland of Malaysian palm plantations ensuring regular supply of crude palm oil. PACOIL's fleet of tankers and its location close to Pasir Gudang Port allows PACOIL to offer shorter lead-time to our valued customers overseas. PACOIL's operations are automated and governed by strong quality control systems. It also possesses state-of-the-art R & D laboratory with access to latest technology in the industry.
